

One stop GDPR compliance tool

PrivacyPerfect offers the ultimate GDPR compliance toolkit. It provides a natural flow between the four administrations required by the new Regulation: data protection impact assessments, prior consultations, data processing activities (including transfers), and data breaches (including breach notifications to supervisory authorities and data subjects).

Your organisation will be held to comply with many GDPR-related requirements. These include meeting controller and processor obligations, fulfilling data subject rights and complying with the requests of supervisory authorities. PrivacyPerfect allows your organisation to enter and assess relevant privacy records and promote them through the 'privacy funnel'.
